GAGAN SHRIVAS

Gaganshriwas5@gmail.com | +91-7999380890 | github.com/gagan-long

Education

Korba Computer College (ABVV) Chhattisgarh, India **2022 - 2025**
- Computer Application | (expected)

Beacon English School Chhattisgarh India **2021 - 2022**
- Higher Secondary (10 + 2) PCM

Skills

JavaScript | APIs | NodeJS | React | Tailwind | MongoDB | MySQL | Git | GitHub | C++ | PHP | OSINT | CYBERSECURITY | LINUX

Work Experience

Digisuraksha Parhari Foundation (internship)

- **Built a full-stack phishing detection platform in Python (Streamlit, Selenium) that analyzes websites and messages for phishing risk, leveraging VirusTotal threat intelligence, SSL/TLS transparency, and automated DOM analysis.**
- **Integrated real-time port scanning, screenshot capture, and community-driven reporting to enhance detection accuracy and user engagement.**
- **Consumed and processed data from major threat intelligence feeds (OpenPhish, URLhaus) for blacklist management.**

Student Mentor / Teaching Assistant (Unofficial) **Dec'2024 - Feb'2025**
Korba Computer College

- Honored with the "Best Assistant Professor as Student" title for demonstrating exceptional teaching support and mentorship to peers.
- Assisted faculty and students in understanding complex technical concepts and project development.
- Conducted sessions, solved queries, and contributed to a collaborative learning environment.

Projects

Phishing Website & Message Analyzer May 2025
GitHub: Phishing_Website_Detector-prototype

Python, Streamlit, Selenium, VirusTotal API, Requests, BeautifulSoup

- Developed an open-source web application to detect phishing websites and suspicious messages using advanced heuristics, threat intelligence, and real-time analysis.
- Integrated VirusTotal API for threat verdicts, SSL/TLS certificate transparency checks, typosquatting detection, and community reporting features.
- Implemented a port scanner, DOM analysis, and automated website screenshot functionality for comprehensive security assessment.
- Designed an intuitive Streamlit UI with phishing awareness quizzes and actionable feedback for users.
- Processed and merged data from multiple public threat feeds (OpenPhish, URLhaus) to maintain an up-to-date blacklist of malicious domains.

E-learning Site Project Feb 2025

GitHub: E-learning_site_project
Technologies: PHP, MySQL, CSS, JavaScript

- Developed a full-featured e-learning web application supporting user registration, course browsing, enrollment, and secure authentication.

- Implemented modules for course management, payments, user profiles, and password reset functionality.
- Designed and maintained a relational database for storing course content, user data, and payment records.
- Integrated admin and user dashboards for streamlined management and improved user experience.
- Ensured security best practices for user data, including password management and access control.
- Ensured security best practices, including 2FA, password management, and access control.
- Collaborated on the project structure using MVC principles and organized code into controllers, models, and views.

Cosmetics E-commerce Website Dec 2024
GitHub: github.com/gagan-long/cosmetics_website
Technologies: PHP, MySQL, CSS, JavaScript

- Developed a dynamic e-commerce platform for cosmetics, supporting product browsing, user registration, shopping cart, and secure checkout.
- Implemented product management features for administrators, including inventory updates, product categorization, and order tracking.
- Designed a responsive front-end interface to enhance user experience across devices.
- Integrated secure user authentication and session management to protect customer data.
- Utilized a relational database (MySQL) for efficient storage of product, order, and user information.
- Applied MVC architecture for organized, maintainable, and scalable codebase.
- Collaborated on documentation and SQL scripts for streamlined deployment and future enhancements.

Academic and Extracurricular Achievements

- Secured 2nd place in a Landing Page Creation Competition, demonstrating strong UI/UX design and front-end development skills.
- Awarded the "Best Assistant Professor as Student" title in college, recognizing exceptional mentorship, teaching skills, and technical expertise.
